

Heavy Duty Design

3-POINT HARROW LIFT

Great for lawns and gardens, golf courses, parks, sports fields, horse & race tracks

Chain harrows cover the ground better than any other type available. The flexible design of the harrow lets the unit hug ground contours regardless of terrain. The harrow can be reversed for aggressive action pulled one way, or lighter action the other.

- Ideal for small tractors for ease of transport
- Easy to set up and disconnect for storage
- Chain link mounting keeps you harrow working with maximum flexibility
- Unique design keeps center of gravity close to tractor
- Cat I and most Cat II 3-point hitch tractors
